

COVER EVERYTHING BY EDL

30 MAY 2014

EDL's Cover Everything laminates go beyond the surface to create inspiring experiences, one space at a time.

The multifaceted, three-dimensional nature of EDL's Cover Everything high pressure laminates is taken a step further with the entry of exciting new additions to the 2014 portfolio.

R-Series

EDL brings you one step closer to nature with the R-Series (Ridges-Series), which closely reflects the characteristics of wood thanks to its tactile grooves, asymmetrical forms and textures, and patterned grains.

Alevé

Still on nature, Alevé laminates are named after the ancient Alevé forest in Piedmont, Italy. One is invited to re-imagine one's natural environment with this collection. Available in 10 feet, the effect achieved is streamlined and seamless with reduced join lines.

Solid Appeal (Fine Matte)

Following the resurgence in demand for matte textures, EDL has introduced a new range of solid colours in a fine matte texture. The new range boasts no reflection and has a powdery finish.
