## Well Framed

Designed by Emmanuel Gallina for Porada, the *Lolita* chair expresses lightness and simplicity with an elegant and angular solid ash frame that supports a singular continuous seat-and-back element. The upholstered component appears to have been gently laid down within the encompassing frame. Gallina describes *Lolita* as a tribute and reference to the style of Gio Ponti.

## Warm Glow

Brushed brass has been added to Plumen's *Drop Cap Pendant* range. It follows the addition of the copper and chrome versions to the white, black and amber options. As with all of Plumen's other pendants, the brushed brass *Drop Cap* fits exclusively with the company's modular sets (including bulbs and shades). *Drop Cap* is pictured here with the *Plumen 002* low-energy bulb. Stockists include the Danish Design Company. See online for a full list of stockists.

## Healing Surface

EDL is distributing the innovative new super-matt smart material *FENIX NTM*® (Nanotech Matt Material) in Southeast Asia. This anti-abrasion surface material is manufactured using a next-generation thermoplastic resin developed with the aid of nanotechnology. Micro-scratches can be healed with the application of heat thanks to the material's inherent shape-memory effect. Easy to clean and hygienic, the material is well suited to food-preparation and sanitary environments.
